

**PP Sport
Court Tile-**

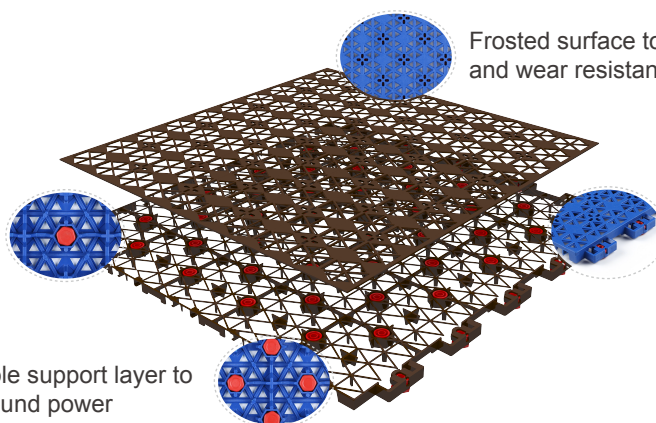

Elastic LF

PRODUCT STRUCTURE

Rubber elastic pads design to provide excellent impact absorption & foot feeling, enhance to grasp the ground adsorption

Dual strengthen stable support layer to provide enough rebound power

Frosted surface to make sure skid resistant and wear resistant

360°C self-expansion elastic adjustment buckles, relieve thermal expansion & cold contraction

PRODUCT FEATURES ↓

 **Meet the new national standard test:**
100% environmental safety, and excellent product performance and sports performance.

 **Frosted/Matte finish Treatment:**
Top surface with frosted treatment to increase friction, improve anti-skid and supply safety.

 **Suspension structural system:**
Suspension structural system can provide elastic cushion for sports, ensure good shock absorption.

 **Compound elastic cushion:**
Excellent ground adsorption stability: the elastic cushions enhance the adhesion of the ground, to effectively prevent the displacement of the tiles.

 **Advantage of elastic cushion tiles:**
High elasticity-back property, small compression deformation, small elasticity change under high and low temperature, remarkable wear resistance and anti-skid.

 **Weather resistance:**
The tiles can be applied between -40° C and 70° C, the sport performance is not affected by climate and season.

Convenient and fast installation:

 Assembly type installation, easy construction, convenient maintenance; All - weather construction, not affected by the weather and climate.

Material	PP	☒
Dimensions	30.48cmx30.48cmx1.45cm	☒
shock Absorption	≥25%	☒
Ball Rebound	≥98%	☒
Service Life	10 years+	☒
Application	Basketball, tennis, badminton, volleyball and other outdoor sport field	☒

COLOR OPTIONS ↓

Red	Green	Dark Green
Light Blue	Sea Blue	Orange
